

Why Use ElastoCrete?

ElastoCrete is concrete like you have never seen it before! This truly revolutionary concrete product solves major problems and provides a unique opportunity for dealers and contractors to add tremendous value to customers.

- Do you need a flooring option with unlimited design options that can be installed over troubled concrete, wood, rubber underlayment or even commercial carpet without cracking?
- Would you like a polished concrete look with cushioned, anti-fatigue qualities?
- What about countertops that can be installed any size with no seams, $\frac{1}{3}$ the weight of granite, and at less than $\frac{1}{2}$ the material and labor cost of traditional concrete and other hard surface options?
- Are you tired of slow turnaround times that cause jobs to be delayed?

ElastoCrete is the answer! With patent pending chemistry, ElastoCrete provides these industry-changing advantages:

- Compression strengths of 7500+ psi
- Flexural strengths of 2000+ psi
- Elastic properties dramatically reduce the risk of cracking and allow installation over troubled substrates
- Unlimited color/design options using regular paint pigments
- Achieve unlimited looks including stone, granite, marble, quartz, GFRC, etc. with simple pouring techniques.
- Can be used with wood and other organic materials with no adverse effects
- Has anti-bacterial, anti-fungal, anti-microbial and hypo-allergenic properties
- Bonds to itself readily, making repairs easy and undetectable
- Can be installed from feathered edge to slab thickness in the same pour without compromising structural integrity
- Can add virtually any aggregate including glass and other recycled materials
- Fast cure times – Being covered cured it can be ready to grind in 12 hours or less

The product has been proven and the time is now to start benefitting from this ground breaking new technology.
